A message on COVID-19

Throughout the course of the COVID-19 pandemic, we made a number of changes with the health and well-being of our Associates, customers, and the communities we serve as a top priority. We considered many factors as we developed enhanced health and safety protocols for our stores, including recommendations of public health authorities in the countries in which we operate. As health and safety guidance evolves, we will continue to follow local health and safety requirements in our stores and make informed decisions. As always, our retail websites will serve as the best source of information about our stores’ health and safety protocols.

We are proud of our Associates around the world for their incredible work addressing the many changes we faced during the pandemic and are especially appreciative of our store, distribution center, and fulfillment center Associates who continued to physically come to work. We thank our customers for their continued support and loyalty.

We are hopeful that the world can move past this health crisis in the coming months, and our hearts go out to everyone whose lives have been impacted by this virus.
